

- If all outputs agree, then they are right in 92.31% of cases
- If all outputs agree, then none is right in 7.69% of cases
They determined a relative key in 0.00% of cases
Closely related key in 0.00% of cases
Something different in 7.69% of cases
- If two outputs agree, these two outputs are right in 60.47% of cases. The third one is mistaken.
1) Overall, if two outputs agree and these two outputs are right, then music21 is right in

80.77% of cases

Music21 determined a relative key in 2% of cases
Music21 determined a closely related key in 3.85% of cases
Music21 something different in 7.69% of cases

2) Overall, if two outputs agree and these two outputs are right, then Krumhansl algorithm is right in 73.08% of cases

Krumhansl algorithm determined a relative key in 0% of cases
Krumhansl algorithm determined a closely related key in 26.92% of cases
Krumhansl algorithm determined something different in 0.00% of cases

3) Overall, if two outputs agree and these two outputs are right, then algorithm SA is right in 46.15% of cases

algorithm SA determined a relative key in 11% of cases
algorithm SA determined a closely related key in 3.85% of cases
algorithm SA determined something different in 7.69% of cases

- If two outputs agree, the third one is right in 13.95% of cases
- If two outputs agree, none is right in 27.91% of cases
- If all outputs are different, they are all wrong in 33.33% of cases
- If no output is the same, then there is one right output in 66.67% of cases:
 - 1) If no output is the same, then Music21 gives the right answer in 75.00% of cases, if it is mistaken, then it determines a relative key in 0.00% of cases, closely related in 16.67 something different in 8.33% of cases.
 - 2) If no output is the same, then Krumhansl gives the right answer in 25.00% of cases, if it is mistaken, then it determines a relative key in 8.33% of cases, closely related in 16.67 something different in 50.00% of cases
 - 3) If no output is the same, then Algorithm SA gives the right answer in 0.00% of cases, if it is mistaken, then it determines a relative key in 41.67% of cases, closely related in 16.67 something different in 41.67% of cases

Number of outputs that agree on the answer	Number of correct outputs given the number of coincidences
3 - 29.89%	3 - 92.31%
	0 - 7.69%
2 - 49.43%	2 - 60.47%
	1 - 13.95%
	0 - 27.91%
0 - 20.69%	1 right - 66.67%
	1 (music21) - 75.00%
	1 (Krumhansl) - 25.00%
	1 (Algorithm SA) - 0.00%

Percent of the same outputs of 3 given algorithms
(How many algorithms give the same answer?)

Percent of correct outputs in case all three algorithms give the same musical key

Percent of correct outputs in case two algorithms give the same musical key

Percent of correct outputs in case all algorithms give different musical keys

Percent of correct outputs of each algorithm
in case all algorithms give different musical keys
